

FACULTY OF GRADUATE STUDIES

APPLIED ECONOMICS(MA E)

Master of Applied Economics

The MAE program provides students with a strong foundation in economic theory and quantitative methods. The program is designed to prepare students for careers in government, industry, and academia. The curriculum includes courses in microeconomics, macroeconomics, econometrics, and applied economics. Students also have the opportunity to complete a thesis or a capstone project.

The MAE program is a two-year program. The first year includes courses in microeconomics, macroeconomics, and econometrics. The second year includes courses in applied economics and a thesis or capstone project. The program is designed to provide students with a strong foundation in economic theory and quantitative methods.

MAE 1000

Microeconomics: This course covers the basic principles of microeconomics, including supply and demand, market equilibrium, and consumer and producer surplus.

MAE 1001: This course covers the basic principles of macroeconomics, including aggregate supply and demand, the business cycle, and monetary and fiscal policy. MAE 1002: This course covers the basic principles of econometrics, including regression analysis and hypothesis testing.

SAMPLE CAREERS

Graduate Researcher, Policy Analyst, Economist, Financial Analyst, and many others.

COST-BENEFIT ANALYSIS AND VALUATION TECHNIQUES * This course covers the basic principles of cost-benefit analysis and valuation techniques. It includes topics such as the identification of costs and benefits, the estimation of costs and benefits, and the calculation of net present value.

COMPETITION POLICY This course covers the basic principles of competition policy, including the identification of anti-competitive behavior and the enforcement of competition law.
